

Incentivos al Retiro

R Markdown

O.L. Vestad / Labour Economics 25 (2013) 98–109

105

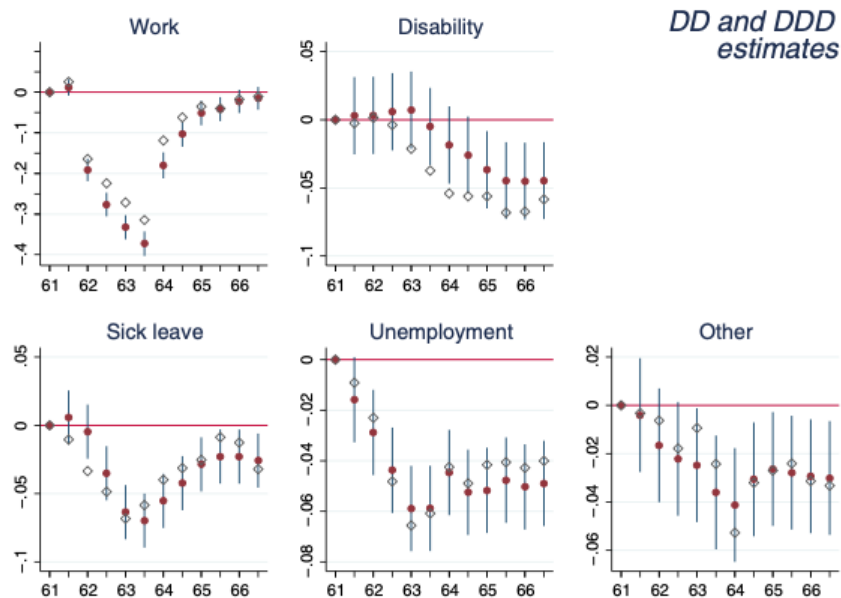

Fig. 4. Age specific DD estimates (red circles), with 95% confidence intervals indicated by vertical spikes. Corresponding DDD estimates are displayed as diamonds.

Como dicen Krueger A. (1992) y Mastrobuoni (2009), Manoli D. (2014)

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   : 2.00
## 1st Qu.:12.0    1st Qu.: 26.00
## Median :15.0    Median : 36.00
## Mean   :15.4    Mean   : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
## Max.   :25.0    Max.   :120.00
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.

Blah blah (see Coile C. 2007).

Ver Ola (2013) o Staubli Stefan (2013), o Atalay (2015), Cribb J. (2016), Hanel B. (2012) y Hanel (2012).
